What are the challenges?

Currently, are electronic records incl. in your records management program?

How to overcome the challenges?

What is the most challenging aspect of information/content management in your organization? UK Sample	We are well on the way to developing and implementing an overall organization strategy...	We have not yet begun a significant ECM project.
Understanding/specifying requirements	10%	19%
Planning & managing implementation, change mgmt	32%	27%
Justifying the investment, executive commitment	19%	31%
Getting employee commitment	20%	9%
Content control, data migration, classification	14%	6%
Selecting products, suppliers	3%	6%

Who should be involved in an ERM implementation?

IT dept – friend or foe?

Who has primary responsibility for the day-to-day management of electronic records in your organization?

How to align solutions with business goals?

What are the necessary skill sets for implementing ERM?

How to avoid building discrete ERM repositories?

What should be part of a Change Management plan?

Thank you
